It is time for Seferihisar's Tangerine

It is time for "Seferihisar's Satsuma Tangerine" which is registered by giving geographical indication by Turkish Patent Institute. The harvest season has begun for satsuma tangerine.

This year Satsuma export started in October 27 which led Turkey earn 163 million dollars foreign exchange in 2020.

Rich in vitamin C, Satsuma tangerine is different than

it's substitutes in the world due to its aroma, sugar content and taste.

The product exported to 49 countries last year, the largest buyer is the Russian Federation, the second Ukraine and the third is Serbia. Do not miss the tangerine which is indispensable in cold countries, on your table during winter season.

Quick meal on board "Bonito Balls"

It is highly not recommended to store leftover fishes that you cooked to eat by reheating it afterwards. But in this recipe, the fish which has been stored in advance correctly, is so delicious and amazing that you will never guess... The bonito that you have cooked can be on your table again in the next day with all it's glory in a different

style of outfit.

Ingredients: 4 slice of cooked bonito extracted from the skin, half cup of flour, 1 egg, half bunch of dill, 1 teaspoon salt, 1 teaspoon pepper, 1 teaspoon black pepper; 2 eggs for top coat , 1 cup bread crumbs, half cup of flour 4 cups of frying oil.

Put the cooked and sorted bonitos in a bowl. Add the flour, egg, salt, pepper and flaked pepper and mix. Add the dill and shape it with your hands without diluting it too much. Beat the egg yolks. Mix the fish mixture that you have shaped with your hands first into the flour, then into the egg, then into the breadcrumbs. Fry in well-browned oil.

To smear bonito ball mix first with flour and then with eggs and with breadcrumbs helps the balls not to fall apart while frying. If you wish, you can also bake the balls in rolled shape in the oven at 180 degrees on oiled paper by lightly pressing them with your hand. You can serve it with lots of lemon and lots of greens. That's it, bon appetit!

Places that you should visit before you die

If we separate the bays to be visited by boat, there are also important cultural heritages to be seen in our country. Did you know that we have 19 assets that have raised Turkey to the 16th place in the world ranking in the UNESCO'S cultural heritage list? With the inclusion of Göbeklitepe in Urfa and Arslantepe Mound in Malatya to the list of United Nations Educational, Scientific and Cultural Organization (UNESCO), 19 of our areas have been included in the world heritage list.

Şekil 1 Hattuşa

The works included in the list are become a common heritage of the communities. It attracts visitors from all over the world. It is necessary not to die without seeing these world heritage sites. The full list that we have prepared for you is as follows:

1. Historical Areas of Istanbul
2. The Great Mosque of Divriği and Darüşşifası (Sivas)
3. Goreme National Park and Cappadocia (Nevşehir)
4. Hattusa (Boğazkoy) - Hittite Capital (Çorum)
5. Mount Nemrut (Adıyaman – Kahta)
6. Xanthos-Letoon (Antalya – Muğla)
7. Pamukkale-Hierapolis (Denizli)
8. Safranbolu City (Karabük)
9. The Ancient City of Troy (Çanakkale)

Şekil 2 Arslantepe Höyüğü

10. Edirne Selimiye Mosque and Complex (Edirne)
11. Neolithic City of Çatalhöyük (Konya)
12. Pergamon Multi-Layered Cultural Landscape Area (İzmir)
13. Bursa and Cumalikizik (Bursa)
14. Diyarbakir Castle and Hevsel Gardens (Diyarbakır)
15. Ephesus (İzmir)
16. Archaeological Site of Ani (Kars)
17. The Ancient City of Aphrodisias (Aydın)
18. Göbeklitepe (Şanlıurfa)
19. Arslantepe Mound (Malatya)

Şekil 3 Göbeklitepe

Sailors leaves tiny amount of carbon footprint

behind

A Carbon Footprint is a type of carbon dioxide measure of the damage is given to the environment by human activities in terms of the amount of greenhouse gases produced. The more a simple life is led with few items, the more waste is decomposed and reduced, the doors of a sustainable world can be opened by reducing the carbon footprint with the use of renewable energy. The simple marine life of the sailors, who have harmony with nature in their

soul, and the current low carbon footprints set an example for all of humanity.

Using the cleanest sustainable energy sources such as wind and solar energy contributes to sustainable living with a simple lifestyle that requires few items. Solar panels, wind turbines and propeller hydraulics largely meet the electrical needs of boats, without requiring any costs other than investment costs. There are not only sailboats, but also motor yachts powered entirely by solar energy.

Boat manufacturers that comply with the rising environmental trends are also able to produce new boats with an extremely small carbon footprint from recycling materials. The ideal shell material used in the production of boats is usually carbon fiber that can go faster with less energy. Hull paints of boats are one of the important elements due to the friction of boats in the water.

Waste should not be thrown into the sea. Dirty wastewater collection points must be included in long trips.

Everything is for your comfort in Teos Marina

As Teos Marina, we renewed and extended Sanitary 1 Ladies Unit according to demands of our guests. The amount of showers and WCs become two times more in the unit. The old dish washing unit has been reconstructed at outside of sanitary unit.

In order to produce enough hot water for all members of our Teos Marina family, we have replaced the boilers in all shower & toilet units with the new ones with a volume of more than two times. All of our shower & WC units have started to serve with the new boilers.

In order to serve more boats in our towing area, we opened up space by demolishing 3 structures that were not used effectively. After that, we will be able to serve 100 boats at the same time with our steel trestles on land. We will continue sharing the work done at Teos Marina day by day in order to respond to the increasing demands and increase the comfort of boat owners.

As Teos Marina Family, we wish everyone a day of pleasure, comfort and peace as we enter the year 2022. Happy New year together...
